

Handleiding Installatie OpenCart Extensie

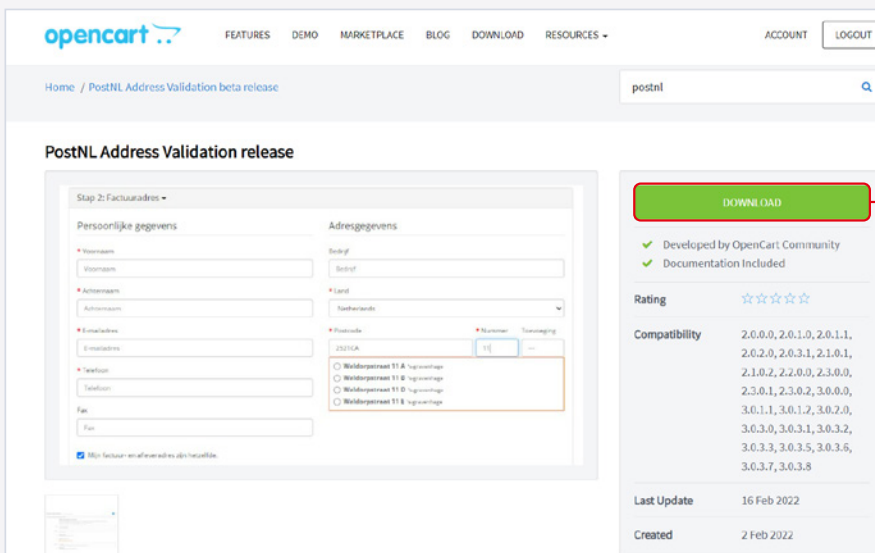

De **OpenCart Adrescheck extensie** vult razendsnel alle Nederlandse adressen aan in je checkout. Zo verstuur je altijd naar het juiste adres.

De extensie is alleen beschikbaar voor klanten van PostNL Pakketten. Nog geen klant? **Klik hier**. De extensie werkt voor OpenCart 2 en 3.

Belangrijk! Zorg dat je een actieve API-key hebt voor de Checkout Postalcode Check. Hoe vraag je een API-key aan? Log in op **Mijn PostNL** en maak gratis een API-key aan. **Klik hier** voor de handleiding.

For the English manual, go to **page 6**

Stap 1. Extensie downloaden

The screenshot shows the OpenCart Marketplace interface. At the top, there is a navigation bar with 'opencart' logo and links for FEATURES, DEMO, MARKETPLACE, BLOG, DOWNLOAD, RESOURCES, ACCOUNT, and LOGOUT. Below the navigation bar, the breadcrumb trail reads 'Home / PostNL Address Validation beta release'. A search bar contains the text 'postnl'. The main content area is titled 'PostNL Address Validation release' and features a preview of the extension's form, which is divided into 'Persoonlijke gegevens' and 'Adresgegevens'. To the right of the preview, there is a green 'DOWNLOAD' button. Below the button, there are several status indicators: 'Developed by OpenCart Community' and 'Documentation Included', both with green checkmarks. A 'Rating' section shows five stars. A 'Compatibility' section lists various OpenCart versions from 2.0.0.0 to 3.0.3.8. At the bottom, 'Last Update' is listed as 16 Feb 2022 and 'Created' as 2 Feb 2022. A red line points from the 'DOWNLOAD' button to the text on the right.

Om de PostNL extensie te downloaden is een OpenCart account vereist.

Ga naar **deze link** en klik op de **download button**.

Stap 2. Inloggen op OpenCart

Download daarna de extensie via de OpenCart MarketPlace en sla deze lokaal op.

Stap 4. Bekijk 'Pre-requisites' en 'Plugin installation'

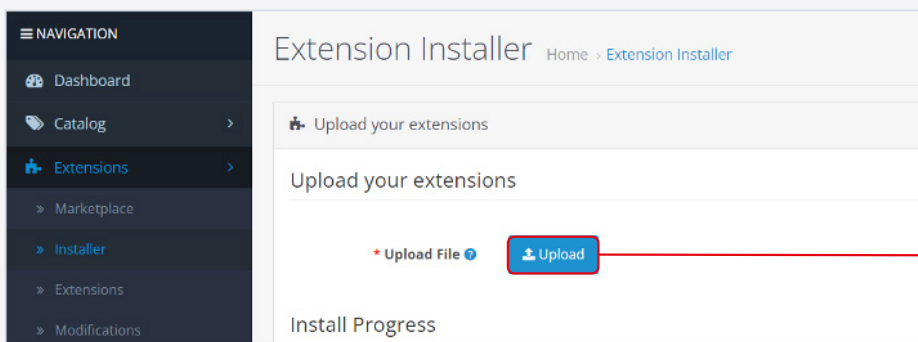

Bekijk 'Pre-requisites' en 'Plugin installation' in de uitgebreide handleiding op **GitHub**.

Stap 5. Extensie uploaden

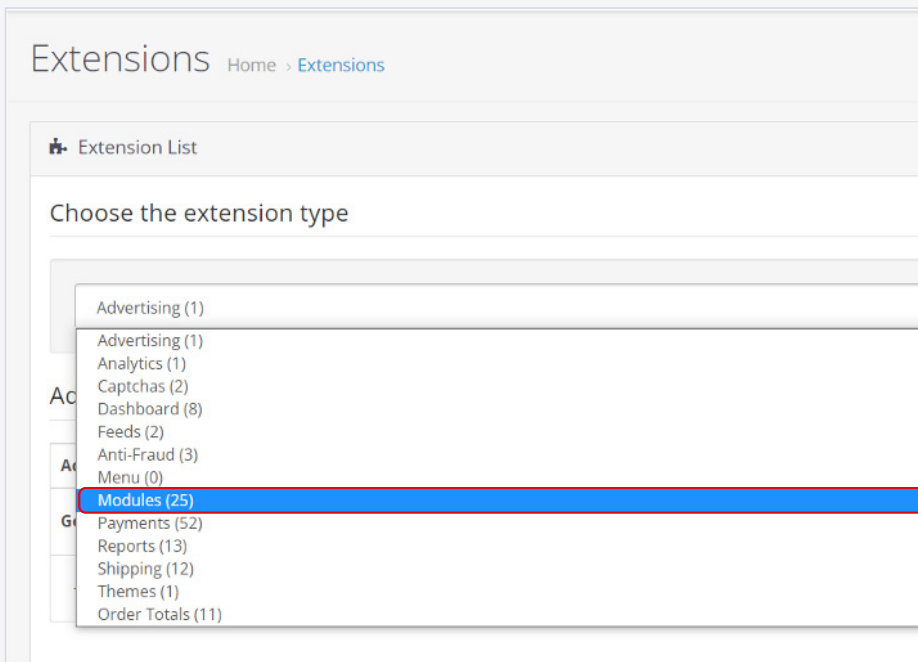

Ga in je OpenCart-omgeving naar **Navigation > Extensions**.

Upload het bestand met de naam **PostNL_Adrescheck-OCxxxocmod.zip**.

Klik na het uploaden op **refresh**.

Stap 6. Extensie installeren

Controleer of het uploaden is gelukt. Ga naar **Extensions > Choose the extension type > Modules**.

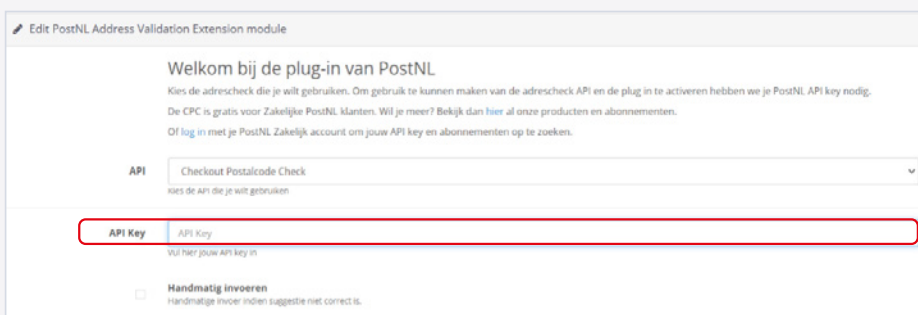

Scroll naar beneden tot je de PostNL extensie ziet en kies **Install**.

Stap 7. API-key koppelen

Controleer of de PostNL extensie op **'Enabled'** staat. Is dit niet het geval? Klik dan op de groene plus.

Klik op **edit**.

Vul hier jouw persoonlijke **API-key** in.

Waar vind je jouw API-key? Log in op **Mijn PostNL** en ga naar beheren. Heb je nog geen API-key aangevraagd? Klik **hier** voor de handleiding API key aanvragen.

Sla de **API-key** op (klik rechtsboven).

Stap 8. Testen van de extensie

Checkout

Step 1: Checkout Options ▾

Step 2: Billing Details ▾

Your Personal Details

My delivery and billing addresses are the same.

Your Address

Company
Company

* Country
Netherlands

 Altijd het juiste adres met de adrescheck van PostNL.

* Address 1
Waldorpstraat 3

* Post Code
2521CA

* City
gravenhage

Om er zeker van te zijn dat de adrescheck werkt, adviseren wij om de extensie te testen.

- Ga terug naar de webshop, plaats een product in je winkelwagen.
- Voltooi de bestelling.
- Voer een bestaande postcode en huisnummer combinatie in.
- Het adres wordt nu opgehaald.
- De installatie was succesvol.

Updaten of verwijderen van de bestaande installatie

Wil je de nieuwe extensie gaan installeren/updaten, zorg er dan voor dat je eerst de huidige installatie verwijderd. Bekijk de uitgebreide handleiding op [GitHub](#).

Installation manual OpenCart Extension

The **OpenCart Addresscheck extension** quickly adds all Dutch addresses to your checkout. So you always send to the right address.

The extension is only available to customers of PostNL Parcels. Not a customer yet? **Click here.** The extension works for OpenCart 2 and 3.

Important! Make sure you have an active API key for the Checkout Postalcode Check. How to request an API key? Log into **Mijn PostNL** and generate an API key for free. Click here for the manual.

Step 1: Download extension

The screenshot shows the OpenCart extension marketplace page for 'PostNL Address Validation release'. The page features a search bar with 'postnl' entered, a navigation menu with 'ACCOUNT' and 'LOGOUT', and a main content area with a form for address validation. The form is titled 'Step 2: Factuuradres' and is divided into 'Persoonlijke gegevens' and 'Adresgegevens'. The 'Adresgegevens' section includes a dropdown for 'Land' (Netherlands) and a dropdown for 'Postcode' (2516CA). A red box highlights the 'DOWNLOAD' button, and a red arrow points from the text 'Go to this link and click on the download button.' to the button.

An OpenCart account is required to download the PostNL extension.

Go to **this link** and click on the **download button**.

Step 2. Log in to OpenCart

Download the extension from the OpenCart MarketPlace and store it locally.

Step 4. Check 'Pre-requisites' and 'Plugin installation'

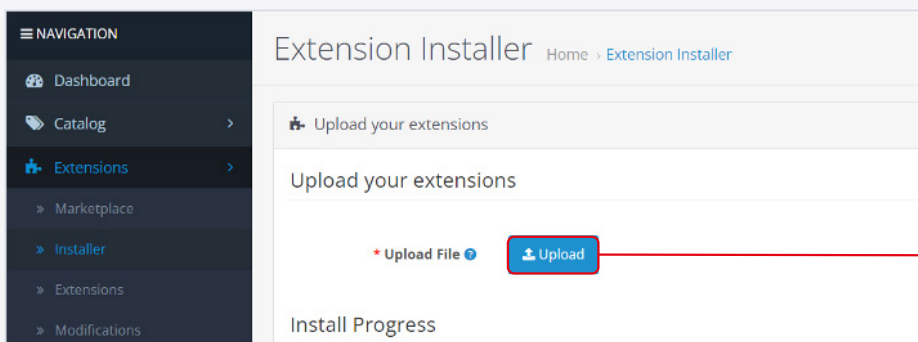

Check 'Pre-requisites' and 'Plugin installation' in the comprehensive guide on [GitHub](#).

Step 5. Upload extension

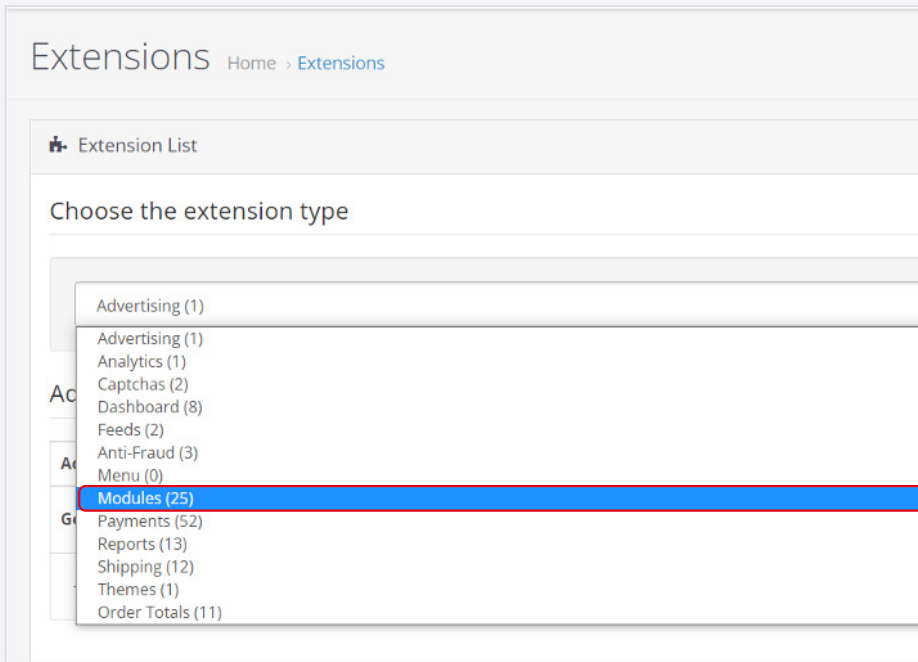

In your OpenCart environment, go to **Navigation > Extensions**.

Upload the file named **PostNL_Addresscheck-OCxxxocmod.zip**.

Click on **refresh** after uploading.

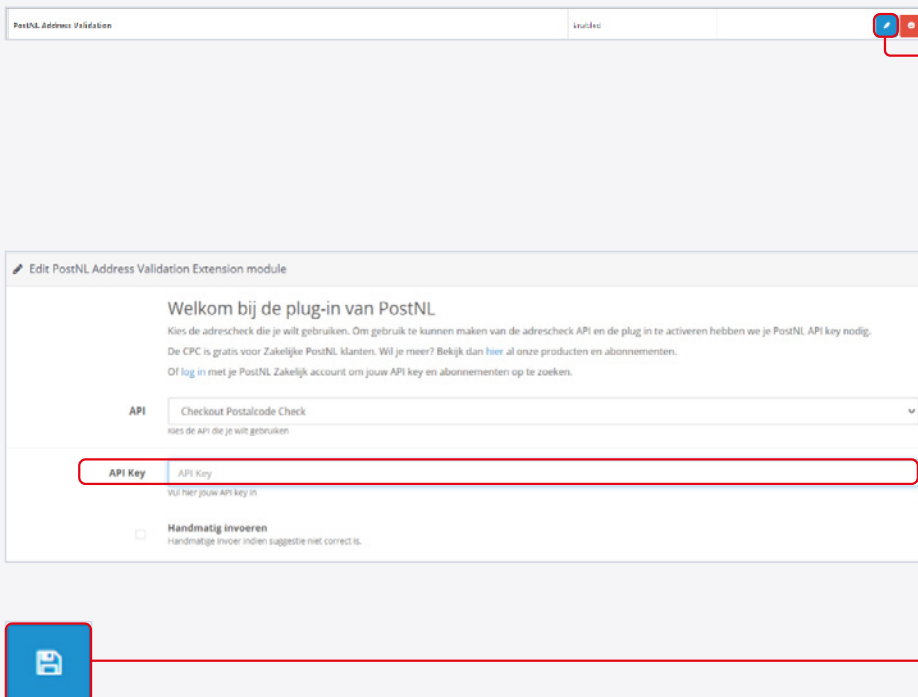

Step 6. Install Extension

Check if the upload was successful. Go to **Extensions > Choose the extension type > Modules**.

Scroll down until you see the PostNL extension and choose **Install**.

Step 7. Linking an API key

Check whether the PostNL extension is set to **'Enabled'**. Isn't this the case? Then click on the green plus.

Click **edit**.

Enter your personal **API key** here.

Where can you find your API key? Log in to **Mijn PostNL** and go to manage. Have you not applied for an API key yet? Click **here** for the manual API key request.

Save the **API key** (click top right).

Step 8. Testing the extension

Checkout

Netherlands

 Altijd het juiste adres met de adrescheck van PostNL.

* Address 1
Waldorpstraat 3

* Post Code
2521CA

* City
gravenhage

To make sure that the address check works, we advise you to test the extension.

- Go back to the webshop, place a product in your shopping cart.
- Complete the order.
- Enter an existing postcode and house number combination.
- The address will now be retrieved.
- The installation was successful.

Update or remove existing installation

If you are going to install/update the new extension, make sure you remove the current installation first. See the extensive manual on [GitHub](#).
