

PostNL and sustainability

What we achieved in 2021

PostNL distributes the most sustainably delivered parcels in NL.

Sustainably delivered parcels in 2021:

80,799,037

Our kilometres are getting ever cleaner.

2020 2021

Proportion of sustainable fuels

2021 saw PostNL reduce carbon emissions by

18%

Number of parcels in millions

Carbon emissions per kilometre

2020	2021
337	384
249gm	203gm

Electric fleet expanded to

2,189

EVs, both large and small.

Saving

3,250

tonnes of CO₂ a year

The energy we use in our sorting centres is free of carbon emissions.

44%

of electricity generated by our own solar panels in our parcel sorting centres. The remainder is powered by sustainable energy only.

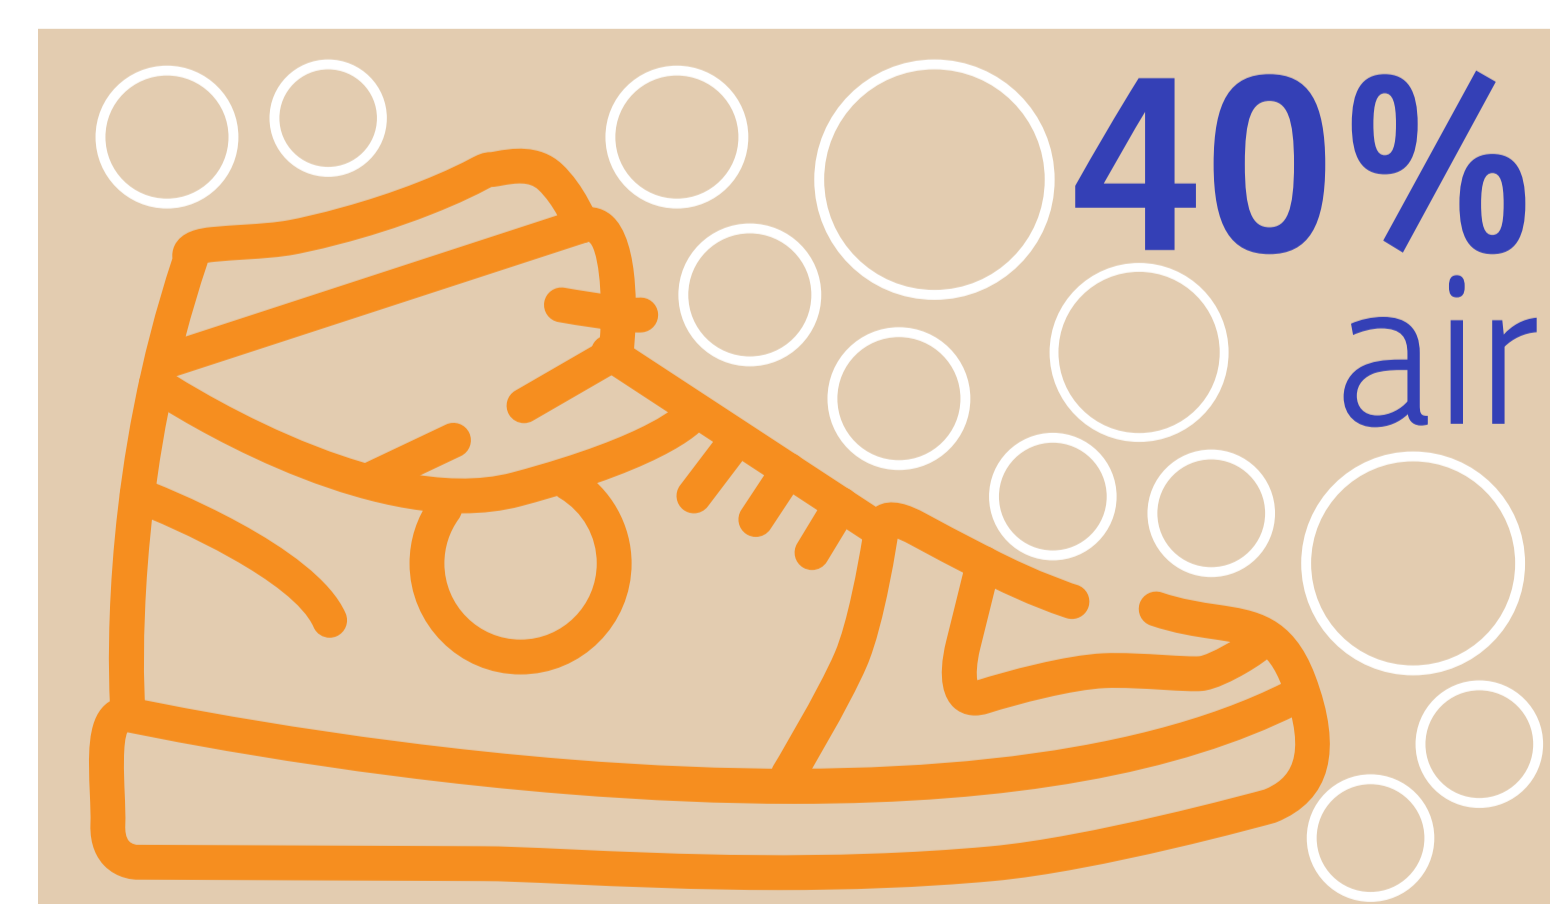

Number of solar panels in 2021:

31,974

In 2021 we transported 25% less air.
