

Delivery times letters and parcels

from the Netherlands to cross border
destinations and return shipments

Delivery times letters and parcels

from the Netherlands to cross border destinations and return shipments

You send letters or parcels from the Netherlands to cross border destinations and you want to know how many days a shipment is on the way. In the table below you will find an indication of the delivery time of letters and parcels. PostNL has no influence on the postal process of others countries, the delivery time may therefore deviate from the indicated delivery time.

Priority or Standard service for letters or (letterbox) packets

In general, all mail is shipped with Priority as long as it has a Priority logo affixed to the item. Without a Priority logo it is shipped as standard service. On average, a mail item with standard service takes 2 working days longer within Europe. Business customer? If your mail is less urgent, you can choose for a slightly longer delivery time at a lower rate. Handy for example when you are sending Direct Mail.

Packet Tracked

For business customers who send parcels up to the size of a shoe box format there is Packet Tracked. Packet Tracked is available to most common destinations worldwide.

The availability and delivery time for this product can be found in this table.

Return shipments to the Netherlands

As a business customer of PostNL you can also use our commercial international returns. The delivery time in the country list applies to the products "IBRS" (up to 2 kg) and "Parcels Europe Returns". The delivery time of "International Returns Basic" and 'International Returns' differs per service and depends on the preferred method and frequency of returning the returns after it is collected.

For more information on this please contact us.

Are you expecting a shipment that cannot be delivered or is returned from abroad? Then the delivery time depends on the postal process abroad.

Express service

The delivery time for Express Service shipments is not included in the table below. This depends on where you send it in the country of destination. On average, the delivery time is 1 or 2 days when it comes to capitals and major business centers in Europe. Out there it takes a little longer, if you want to know exactly, you can inquire at a PostNL location. View here to which countries Express service is available.

Track & Trace

Are you sending a parcel or business packet tracked abroad, we offer standard Track & Trace. In addition, often registered and insured letters and parcels can also be tracked via Track & Trace. This information however, is not shared by default from all destinations. The table therefore also indicates per product and per country whether or not track & trace is available is up to the country of destination.

Postage correctly

Do you sometimes send goods in an envelope? Because of international regulations we must strictly make a distinction between documents and goods. All your goods shipments must have a shipping label with barcode.

For shipments outside the EU customs forms are compulsory. If the forms are missing on your shipment, this can lead to delay, return or even destroy your goods. In addition, information about the shipment must be digitally shared in advance with the country of destination. Therefore we strongly advise to ship items containing goods going abroad online via [jouw.postnl.nl](https://www.jouw.postnl.nl) or as business customer via your personal MijnPostNL account or PostNL API.

Other factors influencing the delivery time

A number of factors can influence the delivery time, this may deviate for example due to:

- Local holidays
- Dealing with customs in the country of destination
- Strikes or other special events in the country of destination

Do you want to be informed on changes in the delivery time? Then go to our International Service Alerts webpage via [postnl.nl/isa](https://www.postnl.nl/isa). This is where you can also sign up for our newsletter.
